

Your Community. Your Health.

What are Community Health Centers?

Community Health Centers (or CHCs) are non-profit organizations driven to provide access to high quality health care for all, but especially to rural, minority, and vulnerable patients. Federal grants help further our mission.

What conditions do CHCs treat?

CHCs provide primary and preventative care. This includes check-ups, vaccinations, and treatment. We also offer dental care, mental health care, and other services to keep you healthy.

What if I need a doctor who sees me more than once a year?

Our doctors build lifelong relationships with patients. They take the time to get to know you, and they coordinate your care with specialists.

What if I don't have health insurance?

CHCs are affordable and accessible. We don't turn people away because of their ability to pay. Insured or uninsured, young or old, every patient is welcome. We also offer free or low-cost medications and supplies.

When are CHCs open?

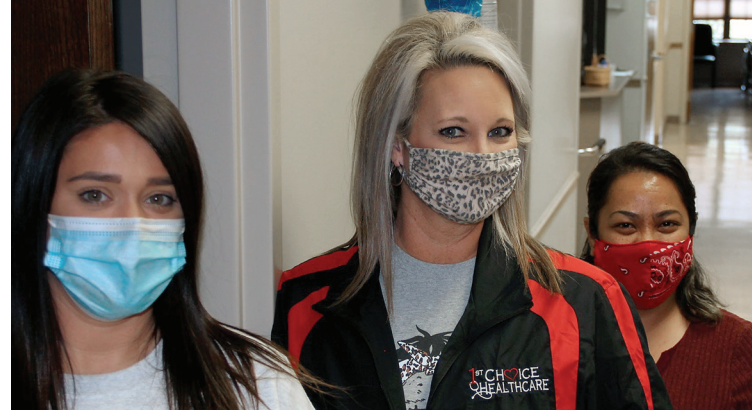

CHCs make it easy. Most CHCs have scheduling that makes it easier to see a doctor. Many are open late and on weekends.

Do you speak Spanish?

Almost all CHCs have medical staff or a service that can speak in Spanish.

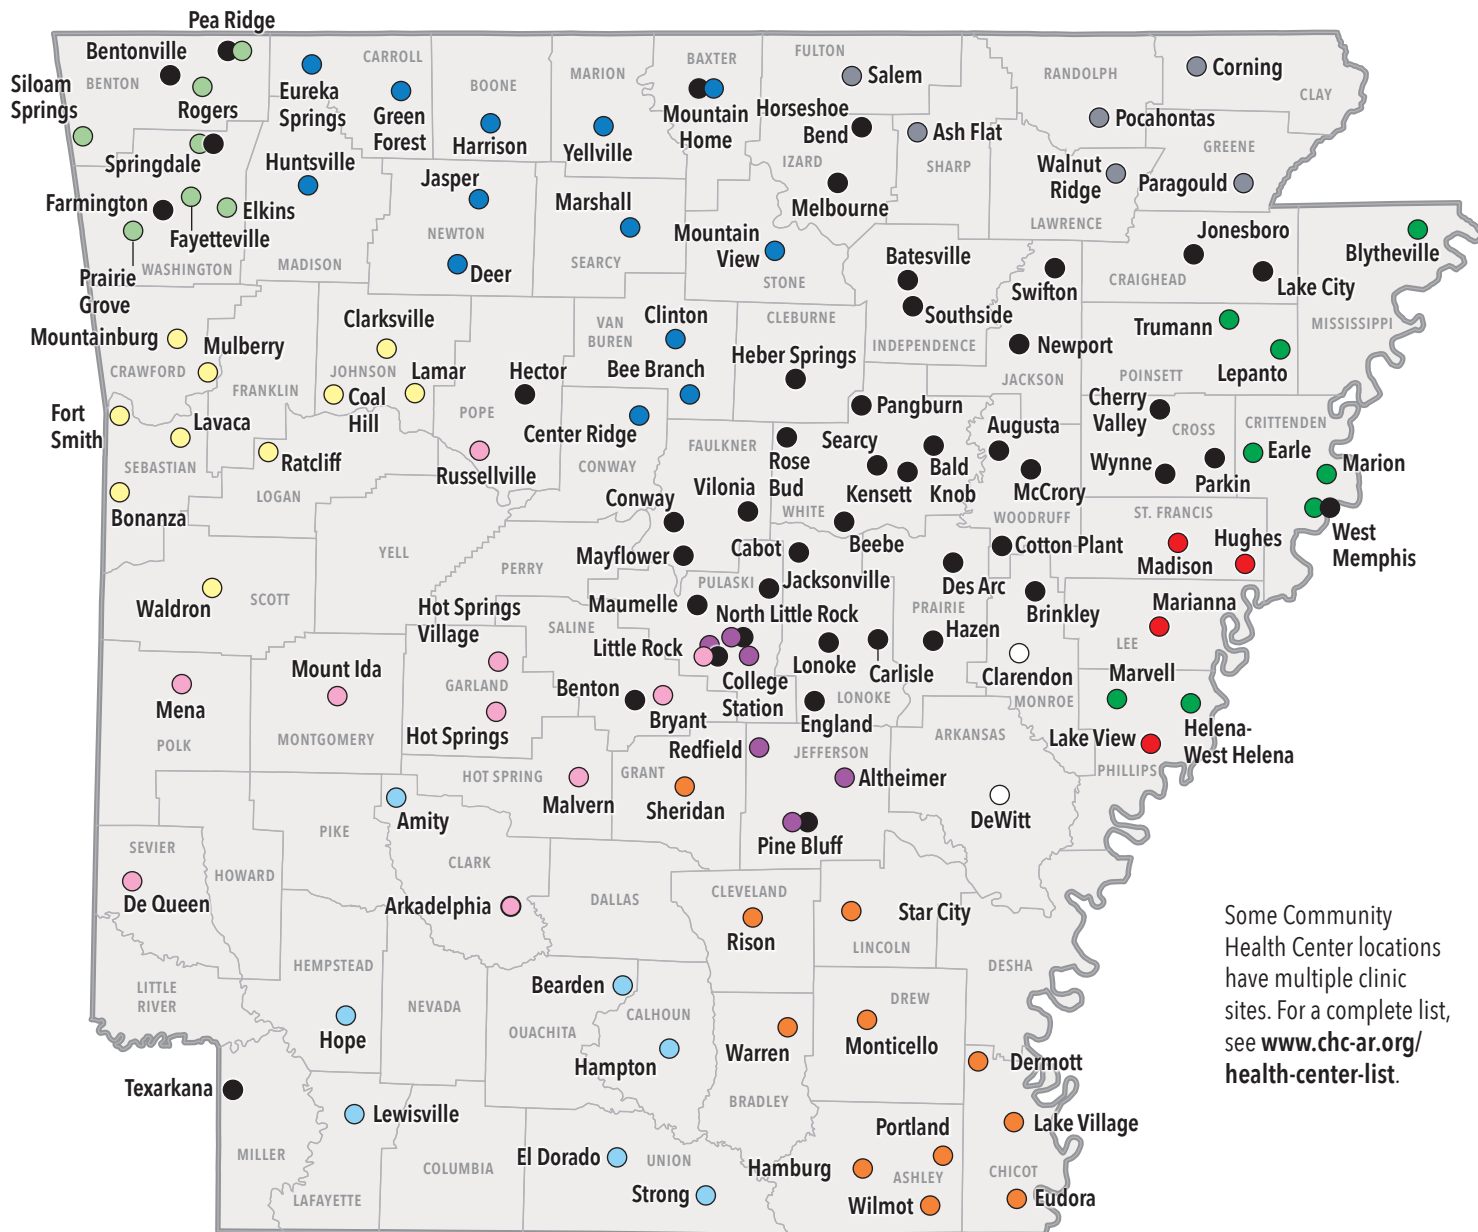

How do I make an appointment?

Find a CHC from the map on back of this fact sheet.
